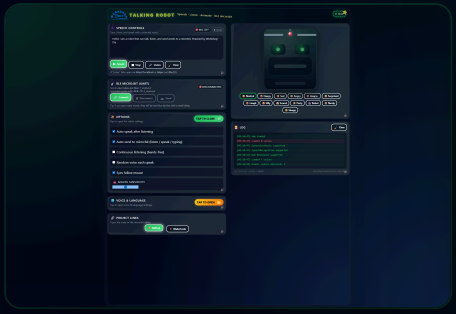
TALKING-ROBOT

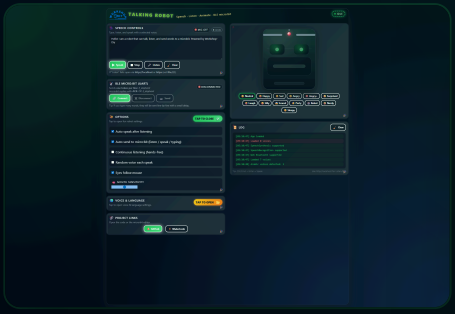
micro:bit V2

Make robots talk. 13 emotions. 16 voices.

The browser IS the robot face.

Type, speak, change face. Optional 5×5 LED face mirror on a micro:bit.





Get started in 60 seconds

1. Open Chrome or Edge on any laptop.
2. Type or speak a sentence.
3. Pick an emotion from the grid.
4. The robot face animates and talks.
5. (Optional) pair a micro:bit for the LED mirror.

13 animated emotions

Happy, silly, scared, party, sleepy, robot, nerdy, love, cool, angry, sad, shy, wink — all face-animated.

16 voice locales

English, French, Arabic — including 8 Arabic regionals (KSA, Egypt, Morocco, Tunisia, Algeria, Levant, Gulf, MSA). Rare.

Optional BLE face mirror

Pair a micro:bit V2: EMO:name commands → 5×5 LED emotion mirror. Per-syllable N_word tokens.

For teachers, kids, and speech therapists.

A kid who can make a robot smile will remember the code forever.
